## PM 1,4

PM is a series of small Epoke spreaders, ideal for the treatment of icy paths and pavements using salt and sand.

The spreaders are reliable, light and precise, with a long lifetime and extremely low maintenance costs.

The simple design of the spreader series is based on well-known Epoke principles, components and quality.

The PM series is ideal for smaller carrying vehicles and is fitted using an integrated three-point suspension.

The spreader is available in two versions:

- PM – powered by the tractor's PTO
- PMH – powered by a hydraulic pump delivering flow of 15 or 30 l/minute

PM and PMH have a spreading width of 1000 mm and a hopper capacity of 140 l.

The spreader's distributor roller ensures precise and even distribution of the spreading material

while the agitator prevents bridging and crushes any lumps in the material.

PM 1,4 was designed for simplicity and easy daily use. The amount of material that is spread is regulated using a handle, which adjusts the tension of the spring base, and the spreader is immediately ready to use.

The PM series undergoes the same thorough surface treatment as all other Epoke spreaders, meaning the spreaders are well protected against rust.

*The PM series is ideal for fitting to smaller carrying vehicle with three-point suspension category 0/1.*

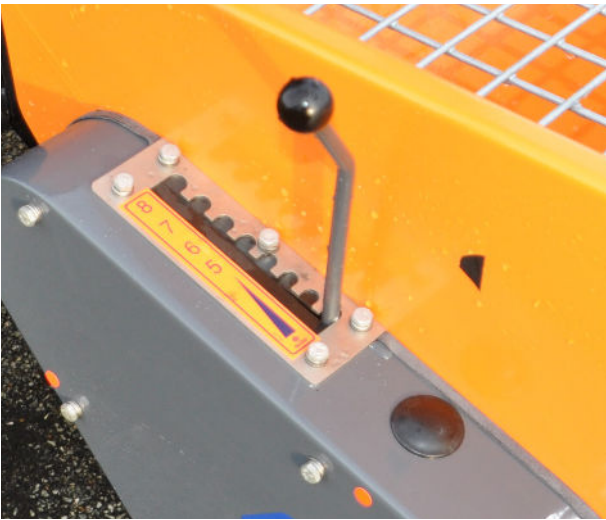

“

**The series is available with extra equipment, extending the range of application:**

- Two different sizes of hopper for increased capacity
- Lights and reflectors for safer operation in the dark
- Tarpaulin to protect the spreading material when it rains or snows

”

*The spreading amount is regulated using a handle on the side of the spreader.*

*PM 1,4 powered by the tractor's PTO.*

*PM 1,4 powered by a hydraulic pump.*

*The safety grate prevents unwanted access to the agitator and distributor roller.*

## EPOKE GROUP

We produced our first sand and salt spreader in 1955, and since then we have solely focused on the development, production and sale of machines and equipment for the treatment of icy roads. Today, we are a global leader. In Denmark, sales are carried out by our own sales staff, while abroad our subsidiaries and 31 dealers manage sales.
